# State-of-the-Art Virus Research in Greece

### Message from the Guest Editors

The Coronavirus pandemic, in conjunction with the recent advances in technology, boosted virus research in Greece, as worldwide. Existing state-of-the-art research on viruses affecting humans, animals, plants and microorganisms joint forces in 2020 with a variety of other biomedical or non-biomedical disciplines as a response to the SARS-Cov-2 pandemic. New technologies and needs in the study of endemic and emerging infectious diseases in Greece have substantially boosted high-quality research into virology. In this Special Issue, we will focus on state-of-the-art virus research in Greece, from virus molecular biology and pathogenesis to antiviral agents and therapy.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.
