Special Issue

Viruses and Climate Change: Looking for a Connection

Message from the Guest Editors

The Special Issue invites submissions on the following topics, but additional relevant contributions are also welcome:

- Climate-Driven Viral Dynamics: Investigate the influence of global climate variations on the prevalence and behavior of viruses, exploring how climate factors may shape viral epidemiology.
- Eco-Evolutionary Responses of Viruses: Examine how viruses adapt and evolve in response to changing environmental conditions, impacting their virulence, transmission patterns, and host range.
- Climate Change as a Catalyst for Viral
 Pandemics: Explore the potential role of climate change in triggering or exacerbating viral pandemics, considering factors such as altered ecosystems, extreme weather events, and habitat disruption.
- Resilience and Adaptation Strategies: Discuss strategies for mitigating the impact of viral infections in the context of climate change, considering both global and local perspectives.

Guest Editors

Prof. Dr. Sandra Mazzoli

- 1. EpiData Epidemiological Group, 24121 Bergamo, Italy
- 2. Retired, Former Chief of the STDs Center, Santa Maria Annunziata Hospital. Florence. Italy
- 3. Former Contract Professor of Clinical and Applied Microbiology, University of Florence, Florence, Italy

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Viruses* (ISSN 1999-4915). *Viruses* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Viruses* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Eric O. Freed

HIV Dynamics and Replication Program, Center for Cancer Research, National Cancer Institute, Frederick, MD 21702-1201, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases.

Journal Rank:

JCR - Q2 (Virology) / CiteScore - Q1 (Virology/Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2025).
