

Special Issue

Development, Progression and Management of Contact Lenses, and Eye Care

Message from the Guest Editor

Dear colleagues, This Special Issue in the journal *Vision* will cover all aspects of contact lenses, including science and clinical theory and management aspects. The upcoming Special Issue will focus especially on contact lenses, therapeutic contact lenses, and myopia. It will also cover the common interface of contact lenses with dry-eye disease, meibomian gland dysfunction (MGD), infections, inflammation, and contact lens care solutions. Regarding this Special Issue's target audience, the clinical practice is of interest to ophthalmologists, optometrists, researchers and vision care providers.

Guest Editor

Dr. Nir Erdinest

About the Journal

Message from the Editor-in-Chief

Vision research has developed tremendously over the last years and has been well served by some of the available journals. We feel that a new journal, with no historical or societal affiliations, offers a chance for a broad interdisciplinary coverage and a means of highlighting the increasing number of interesting results and ideas. We are therefore convinced that the launch of a truly interdisciplinary journal in the area of vision science is worthwhile, timely and necessary. *Vision* is a journal for, and by, all vision scientists, committed to the advancement of their field of interest.

Editor-in-Chief

Prof. Dr. Andrew Parker

Department of Physiology, Anatomy and Genetics, University of Oxford,
Oxford OX1 3PT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed, PMC, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.2 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2025).
