

Special Issue

Role of the Pulvinar in Visual Processing

Message from the Guest Editor

The Special Issue on “Role of the Pulvinar in Visual Processing” will cover major advances in pulvinar research with the following subject:

- Evolution of the pulvinar
- Anatomical and functional organization of the pulvinar
- The transthalamic cortical pathways
- The drivers/modulators concept: is pulvinar driving or modulating the visual cortex?
- Visual properties of pulvinar neurons
- Visual maps in the pulvinar
- Pulvinar and visual attention
- Functional relationships between pulvinar and cortical areas
- Top-down and bottom-up processes involving pulvinar
- Pulvinar and emotions: subcortical fear pathways
- Residual vision: involvement of pulvinar
- What thalamic lesions can tell us about the human pulvinar?
- Schizophrenia: the pulvinar hypothesis
- Pulvinar and attention deficit/hyperactivity disorders
- Imaging the pulvinar in humans and animal models
- Modeling cortico-pulvinar neuronal interactions

About the Journal

Message from the Editor-in-Chief

Vision research has developed tremendously over the last years and has been well served by some of the available journals. We feel that a new journal, with no historical or societal affiliations, offers a chance for a broad interdisciplinary coverage and a means of highlighting the increasing number of interesting results and ideas. We are therefore convinced that the launch of a truly interdisciplinary journal in the area of vision science is worthwhile, timely and necessary. *Vision* is a journal for, and by, all vision scientists, committed to the advancement of their field of interest.

Editor-in-Chief

Prof. Dr. Andrew Parker
Department of Physiology, Anatomy and Genetics, University of Oxford,
Oxford OX1 3PT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed, PMC, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2024).
