

Special Issue

The Relationship between Structure and Function in Glaucoma

Message from the Guest Editors

The relationship between visual structure and function in glaucoma is an area of continuing interest and constant advancement in understanding. *Vision* is seeking original contributions for a Special Issue focusing on structure/function relationships in glaucoma. Research topics of particular interest include, but are not limited to:

- Recent advances in the understanding of structure-function relationships
 - ii. Weaknesses in measures of structure in relation to function
 - iii. Limiting factors in functional measures in relation to structure
 - iv. Structure-structure and function-function relationships
 - v. Novel surrogate measures of retinal ganglion cell density
 - vi. The importance or otherwise of structure-function relationships in glaucoma
 - vii. Changes in the structure-function relationship with disease progression
 - viii. Novel physiological-imaging techniques and relationship with visual function

The issue could include both novel experimental studies and reviews of specific topics, as approved/invited by the editors.

Guest Editors

Prof. Roger Anderson

Optometry and Vision Science Research Group, Ulster University at Coleraine, Coleraine BT52 1SA, UK

Dr. Tony Redmond

School of Optometry and Vision Sciences, Cardiff University, Maindy Road, Cardiff CF24 4HQ, UK

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Vision research has developed tremendously over the last years and has been well served by some of the available journals. We feel that a new journal, with no historical or societal affiliations, offers a chance for a broad interdisciplinary coverage and a means of highlighting the increasing number of interesting results and ideas. We are therefore convinced that the launch of a truly interdisciplinary journal in the area of vision science is worthwhile, timely and necessary. *Vision* is a journal for, and by, all vision scientists, committed to the advancement of their field of interest.

Editor-in-Chief

Prof. Dr. Andrew Parker
Department of Physiology, Anatomy and Genetics, University of Oxford,
Oxford OX1 3PT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed, PMC, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the second half of 2025).
