## Challenges and Sustainability of Water Sensitive Cities

Guest Editor:

**Prof. Dr. Brigitte Helmreich**

Chair of Urban Water Systems  
Engineering, Technical University  
of Munich, Am Coulombwall 3,  
85748 Garching, Germany

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editor

Dear Colleagues,

The consequences of climate change with more extreme weather events. These negative effects are especially enhanced in fast-growing urban areas. Hence, efforts are being made to maintain the natural local water balance and to adapt to climate change in urban areas with the help of decentralized stormwater management.

This special issue on Water will focus on measures and tools for enabling water sensitive cities, their sustainability, associated challenges and opportunities, and role in maintaining the local water balance and climate adaptation.

The special edition will consider:

- Challenges and Investigations on water sensitive cities ;
- Modeling the water balance;
- Build-up and wash-off models or experimental investigations for pollutants in stormwater runoff ;
- Experience with pollution contamination or/and removal;
- Impact of decentralized stormwater management on urban water balance ;
- Analyses about the role of decentralized stormwater management for climate adaption in urban areas ;
- Investigation concerning the sustainability of measures enabling water-sensitive cities ;

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
