Transport of Pollutants and Heat in Surface Water and Groundwater

Guest Editor:

Dr. Chaogi Chen

School of Resource and Environmental Sciences, Wuhan University, Wuhan 430072, China

Deadline for manuscript submissions:

closed (27 February 2024)

Message from the Guest Editor

This Special Issue aims to advance our understanding of the comprehensive interaction of pollutants and environmental factors, extent and refine existing predictive models, and contribute to better pollution control and management strategies.

Keywords

- pollutants
- heat
- surface water
- groundwater
- transport
- dynamics
- modelling
- water quality

IMPACT FACTOR 3.4

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to technological scientific domains and interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
