Deadline for manuscript
submissions:

20 October 2024

Message from the Guest Editor

Water governance has been identified as a necessary prerequisite for the effective planning and management of water resources. At all scales of inquiry, from the local and regional to state-level inquiry, good water governance is critical for the protection of human health and aquatic habitats. It is also essential to ensuring environmental justice regarding access to clean, safe, and affordable water for global communities. But what is good water governance and what examples help answer this question? What are the current barriers to good water governance and what are some opportunities that lay ahead? This Special Issue is dedicated to the current status of water and wastewater governance with a view to current practices and future trends. We welcome papers that help to answer these questions by providing current research, case studies, or literature reviews that engage with water governance.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
