### **Water Governance: Current Status and Future Trends**

Guest Editor:

### **Prof. Dr. Robert Patrick**

Department of Geography and Planning, University of Saskatchewan, Saskatoon, SK S7N 5C8, Canada

Deadline for manuscript submissions:

20 October 2024

## **Message from the Guest Editor**

Water governance has been identified as a necessary prerequisite for the effective planning and management of water resources. At all scales of inquiry, from the local and regional to state-level inquiry, good water governace is critical for the protection of human health and aquatic habitiats. It is also essential to ensuring environmental justice regarding access to clean, safe, and affordable water for global communities. But what is good water governance and what examples help answer this question? What are the current barriers to good water governance and what are some opportunities that lay ahead? This Special Issues is dedicated to the current status of water and wastewater governance with a view to current practices and future trends. We welcome papers that help to answer these questions by providing current research, case studies, or literature reviews that engage with water governance.

## **Editor-in-Chief**

#### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

# **Message from the Editor-in-Chief**

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to technological scientific domains and interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
