Adaptation to Coastal Climate Change and Sea-Level Rise

Guest Editors:

Dr. Borja G. Reguero
Institute of Marine Sciences, University of California, Santa Cruz, 1156 High St., Santa Cruz, CA 95064, USA

Prof. Dr. Gary B. Griggs
Department of Earth and Planetary Sciences, University of California, Santa Cruz, CA 95064, USA

Deadline for manuscript submissions:
closed (12 February 2021)

Message from the Guest Editors

The main goal of this Special Issue is to gather and share best practices, successes, lessons learned, case studies, and general insights that can contribute to advancing adaptation to climate change and sea-level rise. Contributions should focus on adaptation solutions to the impacts of climate change in coastal zones; and may focus on local or broader scales, case studies, modeling, or analytical analyses.

We especially welcome examples of: local or regional adaptation; methods and challenges to implementing adaptation in coastal communities; accomplishments in managing and dealing with sea-level rise, erosion, and flooding; examples of ecosystem-based adaptation, and any other innovative contribution that combines adaptation with the sustainability of coasts and their economies.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
