Impacts of Climate Change on Water Resources and Water Risks

Guest Editors:

Prof. Dr. Haibo Yang

Dr. Zheng Duan

Prof. Dr. Shengzhi Huang

Dr. Yuyan Zhou

Deadline for manuscript
submissions:

closed (30 July 2023)

Message from the Guest Editors

This Special Issue aims to gather contributions on the latest scientific research regarding the impact of climate change on water resources and water risks. This Special Issue hopes to encompass a broad spectrum of topics, including, but not limited to:

- Climate change impact assessment;
- Satellite hydrometeorological monitoring;
- Hydrological modelling;
- Drought monitoring;
- Flood simulation and flood risk evaluation;
- New technologies and approaches in water resource and water risk.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
