## Conflict and Cooperation: The Duality of Cross-Border Water Governance

Guest Editors:

**Prof. Dr. Nidhi Nagabhatla**

**Prof. Dr. David Katz**

**Prof. Dr. Liliana Lizarazo  
Rodriguez**

Deadline for manuscript  
submissions:

**10 September 2024**

### Message from the Guest Editors

Dear Colleagues,

We are pleased to announce the launch of the Special Issue 'Conflict and Cooperation: The Duality of Cross-Border Water Governance'. Specifically, the topics for this Special Issue include, but are not restricted to:

- Submissions that reflect on governance and management pathways implemented in large cross-border basins and wetlands regions in the Americas (and other transboundary regions) and how such regions coordinate their competencies, mandates, and capacities from supranational to local levels;
- Research that illustrates empirical evidence regarding the effects and effectiveness of management of large cross-border basins and wetlands in the Americas (and other transboundary regions) and has such arrangements to ensure water, human, and political security;
- Synthesis papers that reflect on how various levels of governance respond to, anticipate, forecast, and share information concerning water and climate risk management and resilience building for cross-border basins and wetlands regions in the Americas [...]

## Editor-in-Chief

### Dr. Jean-Luc PROBST

ECOLAB, Centre National de la  
Recherche Scientifique (CNRS),  
University of Toulouse, campus  
ENSAT, Auzeville Tolosane,  
France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
