### Message from the Guest Editors

Reversible pump-turbine is the key component of pumped storage power station. It has the functions of peak load regulation, phase regulation, frequency regulation and emergency standby of power grid. Fluid dynamics in reversible pump-turbine is very complex because it operates in both pump mode and turbine mode. There are many problems in the process of working condition conversion. Carrying out relevant researches are necessary for the operation stability and security of pumped storage power station. This Special Issue offers a major opportunity for reporting advancements in the fluid dynamics research of reversible pump-turbine.

Deadline for manuscript  
submissions:

**closed (30 September 2022)**

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
