Quantifying the Effects of Global Change on the Distribution and Quality of Aquatic Resources

Guest Editors:

Dr. Émilie Saulnier-Talbot

Université Laval, Québec City, QC,
Canada

Dr. Isabelle Lavoie

Institut national de la recherche
scientifique, centre Eau Terre
Environnement, 490 rue de la
Couronne, Québec, QC G1K 9A9,
Canada

Dr. Philippe Archambault

Université Laval, Québec City, QC,
Canada

Message from the Guest Editors

This [Special Issue](#) includes studies on continental fresh waters (rivers, lakes, wetlands, groundwater) as well as coastal and marine environments. Articles that address the diverse aspects of aquatic resources and ecosystem research will be considered, including on the topics of modeling, biodiversity assessment, climate, pollution, urbanization, maritime activities, depletion of aquatic resources, ecosystem services, water-related conflicts, and advancements in aquatic resource sustainability.

Several types of articles can be submitted for consideration, including those presenting original research as well as reviews, opinions, concept papers, and essays on any topic related to the theme of the Special Issue.

Deadline for manuscript
submissions:

closed (31 October 2021)

Editor-in-Chief

Dr. Jean-Luc PROBST

ECOLAB, Centre National de la
Recherche Scientifique (CNRS),
University of Toulouse, campus
ENSAT, Auzeville Tolosane,
France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
