Urban Hydraulics: Water Supply and Wastewater Discharge Systems

Guest Editor:

Dr. Joaquim Sousa

Department of Civil Engineering,
Polytechnic University of
Coimbra, Coimbra, Portugal

Deadline for manuscript
submissions:

closed (8 April 2021)

Message from the Guest Editor

Water supply and wastewater systems are vital infrastructures for the well-being of communities. However, in a rapidly changing and increasingly demanding world, these infrastructures are facing new challenges like climate change effects, water scarcity problems, environmental impacts, demographic changes, migrations, or terrorism threats [...]

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
