Kalavrouziotis**

School of Science and
Technology, Hellenic Open
University, 26335 Patras, Greece

Deadline for manuscript
submissions:
closed (15 January 2022)

Message from the Guest Editors

Dear Colleagues,

Plastics and microplastics, along with nanoplastics are pollutants of emerging concern. The topic of microplastics in water bodies, especially freshwater, has only scarcely been studied and requires more attention. Many people drink raw water without any treatment and no treatment for microplastic removal is currently employed for drinking water. In general, we know that much lower particles were observed in treated water compared to the raw water. Thus, this is a topic directly related to human exposure and needs to be further addressed. This Special Issue will include studies related to microplastics found in water bodies such as the oceans, seas, lakes, rivers, creeks, streams, canals, fjords, ponds, wetlands, water reservoirs, but also aquifers and especially karstic systems. It will also include studies that are related to microplastics found in drinking water sources as well as in drinking water both tap and bottled water.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
