Integration of Advanced Oxidation, Biological Treatment and Membrane Filtration for Removal of Micropollutants

Guest Editors:

Dr. Renata Żyłła

ŁUKASIEWICZ Research Network
– Textile Research Institute, ul.
Brzezińska 5/15, 92-103 Łódź,
Poland

Dr. Katarzyna Pazdzior

Department of Bioprocess
Engineering, Lodz University of
Technology, Lodz, Poland

Message from the Guest Editors

The aim of this [Special Issue](#) is to present the latest achievements and trends in research within the field of wastewater treatment and micropollutant removal from water using integrated advanced oxidation processes (AOPs), biological treatment, and membrane filtration (MF).

Deadline for manuscript
submissions:

closed (20 August 2022)

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
