### Message from the Guest Editor

This Special Issue of *Water* will be focused on the conservation of Mediterranean wetlands. It is well known that wetlands are one of the most threatened ecosystems in the world, and this risk is even more evident in the Mediterranean region, where water is a limited resource. During the last century, Mediterranean wetlands have been widely affected by anthropogenic activities, especially those located in the countryside and in coastal areas, where agriculture and urban growth have drastically transformed the structure and functioning of these unique ecosystems. However, another type of wetlands exists, located in mountain areas that were traditionally well preserved, but today also suffer the impact of human activities.

Papers comprising this Special Issue should be original contributions focused on the conservation biology of species and ecosystems that will contribute to supporting adequate management plans for these aquatic ecosystems.

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Ei Compendex](#), [GEOBASE](#), [GeoRef](#), [AGRICOLA](#), [AGRIS](#), [CAPlus / SciFinder](#), [Inspec](#), and many [other databases](#).

**Journal Rank:** [JCR](#) - Q2 (*Water Resources*) / [CiteScore](#) - Q1 (*Geography, Planning and Development*)
