Soil–Water Conservation, Erosion, and Landslide

Guest Editor:

Prof. Dr. Su-Chin Chen

Department of Soil and Water
Conservation, National Chung
Hsing University, Taichung City
40227, Taiwan

Deadline for manuscript
submissions:

closed (30 June 2021)

Message from the Guest Editor

The purpose of this Special Issue is to improve our knowledge on the processes and mechanics of soil erosion and landslides. In turn, these will be crucial in developing the right tools and models for soil and water conservation, disaster mitigation, and early warning systems. Original work submitted on this Special Issue will be given preferential treatment; moreover, papers focusing on the key processes of soil erosion, mechanics of sediment transport, and unconventional tools and methods on these subjects are welcome.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
