Engineering and the Built
Environment, Arizona State
University, Tempe, AZ, USA

Dr. Mohammed J.K. Bashir

School of engineering and
technology, Central Queensland
University, Melbourne, Australia

Message from the Guest Editors

Several countries are threatened by severe clean water shortages due to the impacts of climate change, rapid urbanisation and population growth, and environmental pollution; therefore, using treated wastewater can be considered as an applicable way to overcome the water shortage problems. For further reading, please follow the link to the Special Issue Website at: https://www.mdpi.com/journal/water/special_issues/Wastewa

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
