Water Quality and the Public Health

Guest Editors:

Dr. Varvara A. Mouchtouri

Department of Hygiene and
Epidemiology, Faculty of
Medicine, University of Thessaly,
22 Papakyriazi Str., Larissa 41222,
Greece

Prof. Dr. Konstantin Korotkov

Member of Scientific Counsel, St.
Petersburg Universities LETI and
GPU, St. Petersburg, Russia

Deadline for manuscript
submissions:

closed (15 June 2022)

Message from the Guest Editors

The microbiological and chemical quality of potable and recreational water can affect public health. The effects can be acute or long term, including infectious water-related diseases, as well as chronic diseases. Efforts to ensure the supply of safe water are constantly evolving. Managing the risks requires an interdisciplinary holistic approach at the international, national and the local levels, as well as including building/water facility operators and individuals. Water can be contaminated [...]

France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
