## Water Flow, Solute and Heat Transfer in Groundwater

Guest Editor:

### **Prof. Dr. Alexander Yakirevich**

Ben-Gurion University of the Negev, J. Blaustein Institutes for Desert Research, Zuckerberg Institute for Water Research, Sede Boqer campus, 8499000, Israel

Deadline for manuscript submissions:

**closed (30 April 2020)**

### **Message from the Guest Editor**

This Special Issue on “Water Flow, Solute and Heat Transfer in Groundwater” of *Water*, focuses on recent advances and future perspectives of groundwater studies, including, but not limited to:

Fundamental investigations addressing multi-phase and multi-component interactions using various experimental techniques, mathematical and numerical modeling of physical mechanisms, management strategies, and experience learned from case studies.

Monitoring and predictions of groundwater flow, solute and heat transfer at different spatial and temporal scales, hydrogeochemistry, well hydraulics, hydraulic fracturing, karst, freshwater-saltwater interactions, groundwater contamination, remediation and protection.

Effect of heterogeneity on dynamic and distribution of contaminants, calibrating flow and transport models, and uncertainty associated with predictions and observations [...]

## Editor-in-Chief

### **Dr. Jean-Luc PROBST**

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
