Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editors

Drinking water is a vital need and it is critical to manage the quality of drinking water for safe human consumption. The presence of a wide range of organic, inorganic and biological substances in drinking water (contaminants of emerging concern; CECs) can adversely affect its quality and may impact human health and the environment depending on exposure levels and routes.

Due to the increased use of chemicals and increasing precision of analytical methods, the number of substances detected in water is increasing. Although the measured concentrations of individual substances are, in many cases, so low that no significant health impact is expected, new insights into health effects and combination toxicity can give rise to concerns[...]

Special Issue

water

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology
and Environment, Centre
National de la Recherche
Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
