Department of Civil Engineering
(DINCI), Arcavacata di Rende (CS),
Rende, Italy

Prof. Dr. Marcello Di Risio

Department of Civil,
Construction-Architectural and
Environmental Engineering
Department (DICEAA),
Environmental and Maritime
Hydraulic Laboratory (Llam),
University of L'Aquila, Monteluco
di Roio, L'Aquila, Italy

Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editors

Dear Colleagues,

You are kindly invited to submit a manuscript on any aspect of laboratory or field experiments and/or Eulerian and Lagrangian numerical modelling on wave–structure interaction problems, highlighting the most recent breakthrough(s) in the field of coastal engineering.

The papers will be published in a Special Issue of *Water*, with the main aim being to present the state-of-the-art knowledge on the interaction between water waves (regular, irregular, solitary and tsunami) and structures in fixed and mobile beds such as breakwaters, groins, pipelines, risers, quays, jetties, offshore platforms, renewable energy devices, wind turbines, etc. to researchers and practitioners.

The content of the paper is at your discretion, but an overview of a particular topic of research in your area of expertise and an exposure of the current and future challenges associated with these topics would be particularly valuable.

For further reading, please follow the link to the Special Issue Website at:

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
