Message from the Guest Editors

Dear Colleagues,

Water contamination, water treatment and water resource management are topics of great interest nowadays, due to the adverse effects that contaminated water produce with respect to the environment and human health; and sanitary problems as a result of insufficient clean portable water. Furthermore, it is essential to increase knowledge regarding the monitoring and control of water quality due to the presence of different priorities and emerging contaminants and to develop innovative water and wastewater treatment technologies. As a consequence, we will focus this Special Issue on the current stage of technologies to monitor, control and remove pollutants in water and wastewater.

Message from the Editor-in-Chief

The relevance of water in human development and sustaining life, fuels general and scholarly interest in the world’s water resources. A better understanding of all aspects of water and its relation to food supply, energy production, human health, and the functioning of ecosystems is key in managing this precious resource in a sustainable, efficient and equitable manner. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the *Science Citation Index Expanded* (Web of Science), Ei Compendex and other databases.

**CiteScore** (2018 Scopus data): **2.66**, which equals rank 39/203 (Q1) in 'Water Science and Technology' and rank 34/204 (Q2) in 'Aquatic Science'.
