Deadline for manuscript
submissions:

closed (31 May 2020)

Message from the Guest Editor

Dear Colleagues,

I would like to invite you to submit your latest research findings in bridge hydraulics to a Special Issue of *Water* (ISSN 2073-4441)—an open access journal (<http://www.mdpi.com/journal/water>).

The Special Issue aims to collect recent advances related to the following themes, but not restricted to them: (i) flow patterns at bridges; (ii) general and contraction scour, local scour, breaching embankments; (iii) river training works and countermeasures against scour and erosion; (iv) inspection and monitoring techniques. I also encourage submissions on case studies even when they have a multidisciplinary character.

Prof. Giuseppe Oliveto

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
