Deadline for manuscript submissions:
closed (30 June 2018)

Message from the Guest Editors

Dear Colleagues,

Our goal is to plan a Special Issue on “Small Scale and Decentralized Wastewater Treatment and Reuse within the Concept of a Circular Economy” to be published in *Water*. The manuscripts, which will be selected for publication, will demonstrate the state-of-the-art in wastewater treatment technologies, including various aspects related to wastewater treatment technologies, water reuse suitable for small scale and decentralized systems, recharge of wastewater to the underground and how these affect the circular economy concept. It will also include innovative onsite treatment and reuse systems, where the circular economy approach is shown at a household level.

Dr. Simos Malamis

Dr. Evina Katsou

Dr. Alper Baba

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
