Constructed Wetlands for Water Pollution Control in Urban and Rural Areas

Guest Editor:

Prof. Dr. Ewa Wojciechowska

Gdańsk University of Technology,
Gdańsk, Poland

Deadline for manuscript
submissions:

closed (20 July 2022)

Message from the Guest Editor

This Special Issue encourages submissions covering the broad range of topics related to constructed wetlands applications for water and wastewater purification, bringing new insights into ongoing treatment processes as well as novel technological developments. Review papers and case studies, especially those presenting constructed wetlands integration at urban sites, are also welcome.

Keywords

- Constructed wetlands
- Water pollution
- Removal of contaminants
- VSSF
- HSSF
- Floating treatment wetlands
- Nature-based solutions
- Green infrastructure
- Stormwater runoff treatment
- Contaminants of emerging concern

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
