Geochemistry of Landscape and Soil

Guest Editors:

Prof. Dr. Nikolay Kasimov

Prof. Dr. Tatiana Minkina

Dr. Ivan Semenov

Dr. Carla Sofia Santos Ferreira

Deadline for manuscript
submissions:

closed (28 March 2022)

Message from the Guest Editors

Climate change and environmental pollution affect the equilibrium that has developed over a long period of time in the biosphere. Landscapes are an interface layer between the atmosphere, the lithosphere, the hydrosphere, the biosphere, and humans. Soils as a reflection of the landscape are at the forefront of these interactions, as they play an integral and decisive role in the provision of numerous ecosystem services. The unceasing development of advanced analytical techniques continues to change how questions on soil geochemistry and structure can be addressed, from nano- and micro-scales to the landscape and catchment scale. [...]

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
