Message from the Guest Editors

Dear colleagues,

Since the explicit recognition of the human right to water and sanitation by the United Nations in 2010, there have been numerous initiatives to advance in the interpretation, implementation, and realization of these rights, at different scales—from local to global—and from different stakeholders—international agencies, national governments, local authorities, civil society organizations, activists, service providers, regulators, academia, etc.

We are looking for papers that discuss theoretical approaches, legal and institutional frameworks, and case studies related to those rights, highlighting the normative content of the rights and principles of the human rights. We are also looking to understand the synergies and tensions of the framework of the human rights to water and sanitation and the Sustainable Development Agenda.

In this Special Issue of *Water*, one focus will be discussing and disseminating existing practices in realizing the rights to water and sanitation.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
