Antonarakou**

Deadline for manuscript
submissions:

closed (30 September 2022)

Message from the Guest Editors

This Special Issue aims to provide an overview of the interplay of all these processes across a variety of settings (coastal to open marine) and timescales (early Cenozoic to modern). Among the priorities are the hydroclimate reconstructions using integrated geochemical and/or paleontological proxies measured from different Mediterranean sub-basins. We also encourage contributions outlining the applications of novel state-of-the-art techniques that provide important information on this topic.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
