## Membrane Applications: Wastewater Treatment and Recovery of Valuable Compounds

Guest Editor:

**Prof. Dr. Mari Kallioinen**

Department of Separation  
Science, LUT School of  
Engineering Sciences, LUT  
University

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editor

Membrane-based processes enable recovery, separation, and purification of the interesting compounds from wastewaters. Moreover, they can be used to tailor the molar mass of the recovered fractions, and they make it possible to produce concentrated fractions to be treated further. This makes membrane processes a very attractive option for use in resource recovery from wastewaters. This is a call for papers focused on the use of different membrane processes in the recovery of valuable compounds from wastewaters. A special interest is in processes using advanced, tailored or functionalized membranes or advanced hybrid processes, in which membranes play a key role.

## Editor-in-Chief

### Dr. Jean-Luc PROBST

Laboratory of Functional Ecology  
and Environment, Centre  
National de la Recherche  
Scientifique (CNRS), University of  
Toulouse, Campus ENSAT,  
Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
