Portugal

Deadline for manuscript
submissions:

closed (28 February 2021)

Message from the Guest Editor

I intend to give an overview of the change in the water quality of ecosystems. To this end I will present a case study on the influence of microplastics on phytoplankton diversity in reservoirs. It's really worrying, because we should all look more carefully at the environment around us. Protect the water and the biotic community.

We encourage all the researchers working in this field to send us their manuscripts with the latest advances in this area.

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
