Land Resource Management Unit, Joint Research Centre, European Commission, Via Enrico Fermi 2749, 21027 Ispra, VA, Italy

Deadline for manuscript submissions:

closed (30 September 2018)

# **Message from the Guest Editor**

Dear Colleagues,

This Special Issue will discuss new trends in modelling soil erosion from local, regional, national and continental scale. Preference will be given to new introduced modeling techniques for estimating soil loss by water (or wind). Authors can submit their work related to each of the main factors contributing to erosion modelling: Soil, climate (rainfall), topography, land cover, crop management and conservation practices. The Special Issue can include research studies related to rainfall erosivity and interactions with natural hazards or ecosystem services. We also encourage submissions on the impact of soil conservation policies, future land use changes (including scenario analysis) and climate change in soil erosion modeling. Special focus will be also given to model erosion in agricultural lands. This Special Issue can also include relevant topics such as dessertification, land degradation and sediment transport.

# **Message from the Editor-in-Chief**

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to technological scientific domains and interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
