## Urban Water Policy and Flood Risk Communication

Guest Editor:

**Prof. Dr. David L. Feldman**

Department of Urban Planning  
and Public Policy, University of  
California Irvine, Irvine, CA 92697-  
7075, USA

Deadline for manuscript  
submissions:

**closed (27 August 2019)**

### Message from the Guest Editor

Well over half of the world's population now lives in cities, while many of the fastest growing urban areas lie within coastal areas and along rivers prone to periodic, sometimes severe, flooding. With climate variability likely to intensify, the ability of cities to forecast, prepare for, and manage flood risks—while simultaneously addressing other water challenges such as the management of runoff pollution, the possible harvesting of stormwater for local supply, and the need to prepare for periods of intense drought—make risk communication all the more difficult. We invite cutting-edge contributions that address these and related issues in the context of challenges to, and means of overcoming, the problems in flood risk communication. Original case studies, experimental risk communication efforts, and broadly comparative contributions that chronicle these and other challenges in developing societies are especially welcome. [...]

## Editor-in-Chief

### Dr. Jean-Luc PROBST

ECOLAB, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, campus ENSAT, Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
