Prof. Dr. Giacomo Zanni

Deadline for manuscript submissions:

closed (31 December 2019)

## **Message from the Guest Editors**

Dear Colleagues,

The advancement of information and communication technologies (ICTs) in the agricultural sector is opening up new opportunities to encourage the adoption of sustainable agricultural practices by providing timely and low-cost information services to farmers, as well as assist private and public agencies in coordinating agricultural agents, particularly for the management of water resources. A sweeping technological progress is contributing to increase the reliability of information. This is accompanied by an improvement on data acquisition increasing the ease of use of such technologies. As a consequence, the technological advancement of the digitalization of water management is knocking down knowledge and skills barriers to ICTs in agriculture.

This Special Issue of Water calls for any contribution on this subject, taking an economic, management or policy perspective.

# **Message from the Editor-in-Chief**

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. Water invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to technological scientific and domains interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
