### Message from the Guest Editors

Dear Colleagues,

The objective of this Special Issue is to improve knowledge on the use of economic instruments for water policy and evaluation of the impact of water policy implementation. Contributions will be of great value for environmental agencies, administrators and regulators, and will benefit society as a whole by means of identifying ways of maximizing social utility of water resources allocation and mechanisms to implement economic instruments and methodologies. Discussion will be facilitated regarding water policies tackling drought, climatic change and overextraction in most of the arid regions of the world, such as the revision of the EU Water Framework Directive planned for 2019.

## Message from the Editor-in-Chief

The relevance of water in human development and sustaining life, fuels general and scholarly interest in the world's water resources. A better understanding of all aspects of water and its relation to food supply, energy production, human health, and the functioning of ecosystems is key in managing this precious resource in a sustainable, efficient and equitable manner. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the **Science Citation Index Expanded** (Web of Science), Ei Compendex and other databases.

**CiteScore** (2018 Scopus data): **2.66**, which equals rank 39/203 (Q1) in 'Water Science and Technology' and rank 34/204 (Q2) in 'Aquatic Science'.
