## Water Management and Environmental Protection

Guest Editors:

**Dr. Mariusz Adynkiewicz-Piragas**

Institute of Meteorology and  
Water Management National  
Research Institute (IMGW-PIB),  
Warszawa, Poland

mariusz.adynkiewicz@imgw.pl

**Dr. Daniel Gebler**

Department of Ecology and  
Environmental Protection,  
Poznań University of Life  
Sciences, Poznań, Poland

daniel.gebler@up.poznan.pl

Deadline for manuscript  
submissions:

**30 April 2022**

### Message from the Guest Editors

Currently, more than 20 years after the adoption of the WFD, we can point out the effects of the functioning of the new approach to water management and define further challenges. For this Special Issue, studies concerning the latest knowledge in the field of water conditions, protection, and sustainable management, with special consideration of environmental aspects, will be especially welcomed. The topics will include:

- Sustainable management of water resources;
- Evaluation of the ecological status of waters;
- Environmental services of aquatic ecosystems;
- The influence of climate changes on water management;
- Innovative solutions in water management considering environmental needs;
- Water resources modelling;
- Methods of water management optimization; [...]

## Editor-in-Chief

### Dr. Jean-Luc PROBST

ECOLAB, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, campus ENSAT, Auzeville Tolosane, France

## Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Ei Compendex](#), [GEOBASE](#), [GeoRef](#), [AGRICOLA](#), [AGRIS](#), [CAPlus / SciFinder](#), [Inspec](#), and many other databases.

**Journal Rank:** [JCR - Q2 \(Water Resources\)](#) / [CiteScore - Q1 \(Geography, Planning and Development\)](#)
