

Special Issue

Water Management and Uses: Comprehensive Analysis of Landscape, Heritage and Environment

Message from the Guest Editor

Water in connection with landscape conservation, the protection of cultural heritage, and environmental impacts must be analysed from the perspectives of different disciplines due to the complexity of integrated water resources management, addressing urgent challenges that require multidisciplinary and collaborative approaches. This Special Issue aims to extend the current body of knowledge by presenting the latest insights in the field of resilient water resources management, as well as the environmental diagnosis of the different uses of water from a holistic perception, by integrating landscape and heritage issues. Research areas may include the following: legal assessment; socioeconomic analysis; long-term perspective; sources and infrastructures of water supply to cities, agriculture, industry, tourism, or recreational uses; heritage and landscape; surface, groundwater, and non-conventional resources; risks management and mitigation; water quality and advanced treatments; or nature-based solutions. We especially encourage submissions that examine results from an integral view, considering policy and governance determinants.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
