

## Special Issue

# Harmful Cyanobacteria and Their Ecotoxicological Studies

### Message from the Guest Editors

Every year, especially in the summer, many water environments experience cyanobacterial blooms that cause various problems for the functioning and balance of the ecosystems. At the same time, cyanobacteria perform important ecosystem services in both aquatic and terrestrial ecosystems. In this Special Issue, we seek contributions that bring new insights into cyanobacteria-related ecotoxicological research.

## About the Journal

### Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
