

Special Issue

Application of Smart Technologies in Integrated Water Quality Modeling

Message from the Guest Editors

This Special Issue aims to delve into methodologies pertaining to water quality, encompassing water resources, aquatic ecosystems, and the assessment of water environment carrying capacities, alongside case studies in representative regions. Keywords

- environmental model
- assessment method
- statistic model
- mechanism model
- regional indicators
- machine learning
- water resource environmental model
- assessment method
- statistic model
- mechanism model
- regional indicators
- machine learning
- water resource

Guest Editors

Dr. Tianxiang Wang

School of Ocean Science and Technology, Dalian University of Technology, Panjin, China

Dr. Alex Neumann

Department of Physical and Environmental Sciences at Scarborough, University of Toronto, Toronto, ON, Canada

Deadline for manuscript submissions

closed (25 November 2024)

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR
CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique
(CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane,
Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
