

Special Issue

Optimisation of Water Distribution System Design and Operation Under Uncertainty

Message from the Guest Editors

This Special Issue invites original research and case studies focused on the optimization of water distribution systems in the face of uncertainty. Key areas include the integration of hydraulic and water quality considerations into design and operational frameworks, accounting for uncertain inputs such as fluctuating demands, sensor inaccuracies, infrastructure degradation, and environmental variability.

Guest Editors

Prof. Dr. Avi Ostfeld

Faculty of Civil and Environmental Engineering, Technion, Haifa 32000, Israel

Dr. Sriman Pankaj Boindala

Faculty of Civil and Environmental Engineering, Technion–Israel Institute of Technology, Haifa, Israel

Deadline for manuscript submissions

24 December 2025

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
