

Special Issue

Water, Health and Environmental Justice

Message from the Guest Editors

Access to adequate water services is a basic requirement for ensuring the health of human population. It is estimated that one-tenth of the global burden of disease could be averted with adequate water supply, sanitation, hygiene, and overall water resource management. Safe access to water could prevent, among other causes, millions of deaths from diarrhea and malnutrition, malaria and other vector-borne diseases, not to mention the potential direct and indirect socioeconomic effects of inadequate and inequitable water management. Therefore, this issue invites articles that analyze the inequitable exposure of marginalized and impoverished populations to the hazards of lack of access to safe water, that address the inequitable distribution of water-related environmental hazards, and that promote the principles of environmental justice by developing actions that advocate for fair treatment before the law and public policy and for the possibility of effective participation of all.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
