Changes in Hydrology and Rainfall–Runoff Processes at Watersheds

Message from the Guest Editor

Currently, many geographical regions are experiencing rapid changes in land use/land cover [LULC], which are generally the result of agricultural or urbanization pressures and sometimes their abandonment. These processes are often also influenced by documented changes in precipitation patterns and associated frequent precipitation-free periods. It is therefore pertinent to present the latest findings on the response of watershed areas to ongoing climatic and environmental changes. These areas of research are crucial not only in shaping water resources and river flow regimes but also in sustainable water management throughout basins. [...]

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
