Special Issue

Hydrological and Water Resource Responses to Climate Change and Anthropogenic Interferences

Message from the Guest Editors

- Hydrological Cycle Alterations: Changes in precipitation patterns, evaporation rates, and runoff dynamics.
- Water Resource Vulnerability: The vulnerability of freshwater resources to climate variability and extreme weather events.
- Adaptive Water Management Strategies: Water management strategies and policies that can enhance resilience and mitigate the impacts of climate change and anthropogenic interferences.
- Integrated Water Resource Planning: Integrated approaches to water resource planning and management that consider both climate change projections and societal demands.
- Remote Sensing and GIS Applications: Monitoring and prediction of hydrological changes and water resources dynamics.
- Socio-Economic Implications: Analyzing the socioeconomic impacts of climate change and anthropogenic interferences on water security, food production, and human health.
- Cross-Disciplinary Perspectives: Providing comprehensive insights into the complex waterclimate-society nexus.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse. France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
