

Special Issue

The Blue Economy: Enhancing Marine Economic Security for Sustainable Development

Message from the Guest Editors

In this Special Issue, we seek to understand and report on innovative approaches and best practices for enhancing marine economic security within the framework of the Blue Economy. We will focus on sustainable strategies across key sectors such as fisheries, marine transportation, tourism, and coastal development. Topics of interest include the impact of economic activities on marine biodiversity, sustainable resource management practices, and the socio-economic benefits of robust marine environments. This issue will provide valuable insights into fostering a sustainable Blue Economy that secures human prosperity and ocean health for future generations.

Guest Editors

Prof. Dr. Shuhong Wang

Marine Economics and Management, Shandong University of Finance and Economics, Jinan, China

Dr. Ye-Cheng Wang

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
