Special Issue

Research on Soil and Water Conservation and Vegetation Restoration

Message from the Guest Editors

Welcome to this essential Special Issue focusing on soil and water conservation, alongside vegetation restoration—a nexus central to environmental resilience. We are committed to dissecting and mitigating soil erosion's effects, driving successful ecological restorations, and contextualizing the sweeping reach of climate change. This Special Issue will offer comprehensive assessments of varied ecological restoration endeavors, delineating methodologies, results, and strategic recommendations. Furthermore, it will discuss the ecological repercussions of restoration, scrutinizing soil health indicators, biodiversity impacts, and broader water system and climate modulation effects. Our aim is clear: to cast light on the cohesive strategies necessary for overcoming the complex tribulations of soil and water depletion and vegetative decline. We strive to galvanize a united drive among scientists, field experts, and policymakers to sustainably cultivate symbiotic relationships with our natural world.

Guest Editors

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST
Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
