

Special Issue

Indigenous Water: Knowledge, Rights, and Sustainable Management

Message from the Guest Editor

Water is central to the cultural, spiritual, and material well-being of Indigenous peoples worldwide. This Special Issue focuses on Indigenous water knowledge, water sovereignty, and sustainable water management. It welcomes research articles, reviews, and case studies exploring the intersections of Indigenous water knowledge, water governance, water resource management, environmental justice, and climate resilience. Topics include, but are not limited to, Indigenous water rights, the “Water Back” movement, Indigenous-led watershed restoration and reconciliation initiatives, ecosystem services management, technological advances in water treatment, water quality protection and remediation strategies, sustainable water resource planning, and policy frameworks incorporating Indigenous knowledge and perspectives. This Special Issue aims to provide a platform for advancing culturally informed, equitable, and sustainable approaches to water management and governance.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
