Special Issue

Treatment Wetlands Applications in the Development Projects

Message from the Guest Editor

This Special Issue aims to showcase research on the aplication of treatment wetlands in development projects, e.g., aquaculture, floriculture, agriculture, etc., in poor and remote communities. We invite the submission of research articles related to the use of TW in development projects. A variety of topics are welcome, including, but not limited to, the following:

- TW for treatment and reuse of storm, municipal, and industrial wastewater,
- use of TW in developing countries,
- use of TW for water reuse in arid climates.
- · use TW in remote communities in cold climates,
- removal of common and emergent pollutants by TW in remote communities.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.
