

Special Issue

Water, Wastewater and Waste Management for Sustainable Development

Message from the Guest Editor

Sustainable development is one of the most important challenges of the 21st century. On the other hand, society's impact on the environment is becoming increasingly evident. It concerns almost every country in the world. Despite the development of newer technologies, many people still do not have access to the appropriate quality resources, including but not limited to food and water. Therefore in the light of circular economy becoming a globally acknowledged philosophy, water, food, and other resources should be protected both qualitatively and quantitatively. This Special Issue titled "Water, Wastewater and Waste Management for Sustainable Development" will cover topics related to sustainable water, sewage, and waste management, including resource reduction, treatment, and environmental impact.

About the Journal

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Editor-in-Chief

Dr. Jean-Luc PROBST

Centre de Recherche sur la Biodiversité l'Environnement (CRBE) UMR CNRS/UPS/INPT/IRD, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, Toulouse, France

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Water Resources) / CiteScore - Q1 (Aquatic Science)
